Arrays and ArrayLists Lab Questions

Answer the following questions while working with your partner.

1. What is displayed for the last two array elements in Step 2 of this lab? **Null**

2. Why is it that value?

   Because its an empty space in the array

3. Are both instances of "Meg" removed correctly from the array in Step 4? Why or why not? Can you explain what you observe in your code?

   Yes, they were both removed

4. What do you notice about the array in main and the array in the modifyArray() method. Are they the same array? Explain what is happening.

   They are not the same array. Its a variation

5. In Step 7, was "Meg" removed completely from the list? Why or why not? Explain.

   Yes it was removed completly.
